

ELINOR WONDERS WHY

EP 111B Snow Friend
By Katherine Sandford

Elinor's Question: Why is the snow different today from yesterday?

Logline: Elinor and her friends want to build "snow-friends" but the snow isn't sticky enough.

ES1. Understand that the Earth is made up of a variety of natural materials. a. Explore and describe the characteristics of earth materials such as sand, rocks, soil, water, and air b. Explore water and other Earth materials during play using simple tools. (Elinor and her friends explore the characteristics of snow and.)

SEP1. Asking questions (science) and defining problems (engineering)

a. Demonstrate curiosity about the greater world outside of their local environment

b. Ask more complex questions about observable phenomena

c. Ask and/or identify cause and effect questions that can be answered by an investigation

d. Identify a problem that can be solved by the design a new or improved object or tool (engineering)

(Elinor and her friends ask questions about the snow and identify the properties of snow that is good for making snowballs)

SEP6. Constructing explanations (science) and Designing Solutions (engineering) a. Use background knowledge experiences, and data to construct reasonable explanations and theories of natural phenomena (science) b. Look for and describe patterns and relationships in natural phenomena (science) c. Use and apply productive science discourse to support an explanation d. Use evidence to support a theory or solution to a problem (engineering) (Elinor observes that when the weather is colder the snow doesn't stick together and she and her friends figure out that to make the snow stickier, they should warm it up.)

MAINS: Elinor, Ari, Olive, Olive's Mo

SECONDARY: Ari's Mom.

LOCATIONS: Olives's house, interior and exterior, Ari's room, Ari's Kitchen.

PROPS: Plastic buckets, boot tray, wood stove - snow!
