

My Little Pony – Season 8

809 Storybreak

- instead of bobsled racing, maybe have them racing two canoes or have them all in one long boat, and show the competition of Rainbow Dash and Apple Jack giving orders to the crew.
- for building the bridge, AJ and RD build different bridges (vine and wood) on a cleft that starts to tangle and fall down, putting them in danger
 - Beneath them is a school of flying piranhas
- Students help get them out but also take the tangled pieces and build a stronger bridge
 - Students think their teachers are clearly using reverse psychology as they wouldn't even choose the easier and most obvious route = flying
 - Students think AJ and RD did a good job of showing how to work together (or intertwining two different types of materials)
- Make sure to build up AJ and RD's competitiveness
 - Show AJ and RD get too far in the competition that they try to compete even when not competing so when the students suggest flying, they refuse.
 - Students only think that they're so committed to the lesson and not that they're actually being competitive
- Want to have each student use their talent
 - Gossamer becomes a fish or a large animal that distracts the flying piranha
- Students should have a quick pow wow before working together
- AJ and RD are reminded of the lesson more than the students
- TS knows they competed
