

FORTNITE

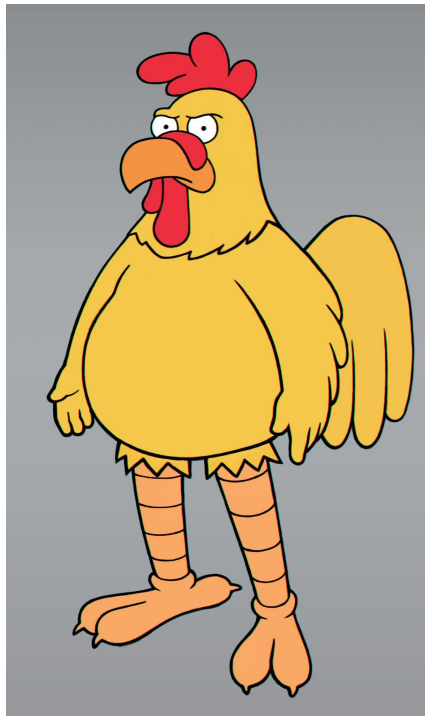

COSMETIC OVERVIEW & PROPOSAL
7/18/23

CHICKEN - Default Outfit

The “Default Outfit” is the first version of the character cosmetic that will be presented to players in the Shop, their Locker, and in key Marketing materials.

- **Chicken Outfit**
 - Toon Shaded
 - **20th Century -**
 - Our team would like to include the Chicken we were previously exploring as part of the activation. The Chicken would release in the Item Shop during the same time that Peter is in the Battle Pass.
 - Please note, we will have to make some slight proportional changes to the previous version your team was reviewing so that it fits appropriately on our rig and avoids any clipping when he’s in certain poses, which we’ll resubmit the 3d model for your review.
 - Additionally, his tail will need to be hidden when the player chooses to equip capes in-game. This is standard functionality in Fortnite so that capes can function properly on a character’s back. Please let us know if your team is alright with this.

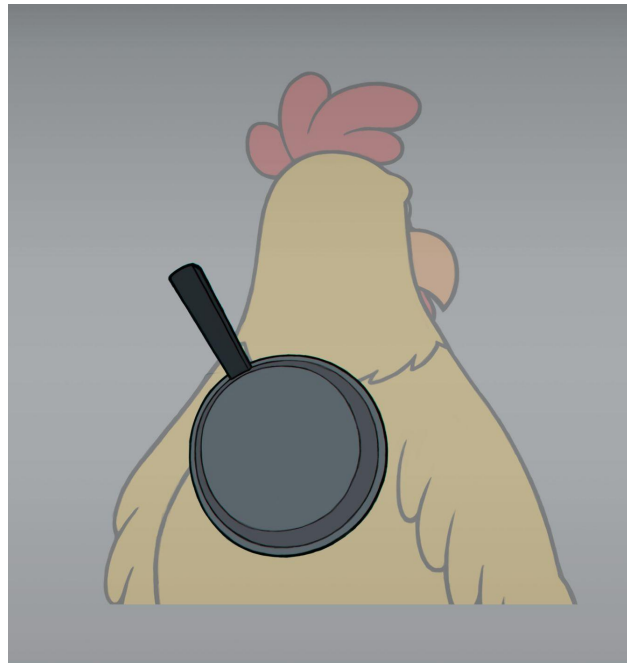

CHICKEN - Backbling

Backblings are accessory items that are typically sold with the character Outfit. They can be worn with any Outfit in the game and will hover on the player's back.

- **Frying Pan**
 - Toon Shaded
 - **20th Century -**
 - Since we'd like to bring back the Chicken, we'd love to also have accessories for him as well. For his backbling in particular, we'd love to include the Frying Pan we were previously exploring.
 - If this sounds good to you, then we'll be sure to send through the 3d model that we were previously working on for your review.

CHICKEN - Pickaxe

Pickaxes are harvesting tools that players select from their Locker to play with in the match. It's the only item they have at the start of each match, and can be used to break down materials or inflict damage on elements and players in-game.

- **Butt Scratcher**

- Toon Shaded
- 20th Century -

- Our team would love to include a pickaxe for the Chicken. Originally we were exploring a cello for him, but with Leela's violin releasing in-game, our team feels like they look very similar and would like to offer player's something different, if possible.
- We wanted to see if your team had any suggestions of a potential pickaxe we could do for the Chicken and if you have any good reference images that you could send to us that we can use as official concept. That'll help our team jump straight into 3d for this asset.
